

"One More For The Road"

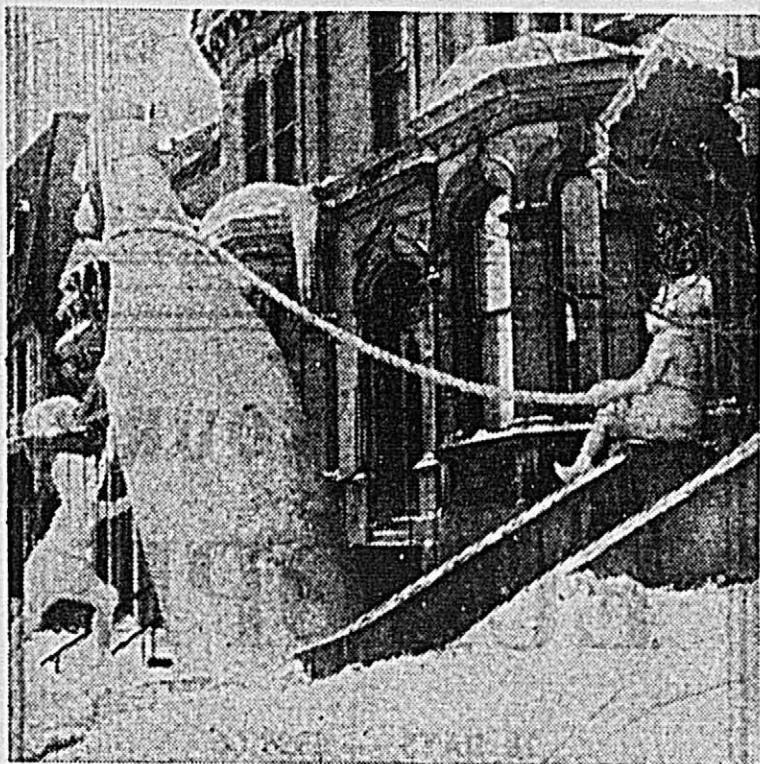

PHOTO BY HENDRY

THIRSTY GNOMES have spent a strenuous week in front of the University street Delta-Sigma-Phi House. Only thing they've moved so far, however, is the judges' panel which handed their creators top prize in the Carnival sculpture contest. The frosty flagon hasn't budged. The drips still hover.

Debaters Expect MP Observers

Tomorrow evening's death penalty debate sponsored by the McGill Debating Union is expected to be closely watched by Ottawa parliamentarians, who are looking for a shift in government policy on this thorny problem.

The present cabinet has commuted seventeen of the twenty-one death sentences reviewed since it has taken office, although it has refused to sponsor legislation calling for the abolition of capital punishment. Participating in the debate will be Arthur Maloney, a conservative of Parliament for Tor-

onto Parkdale, and former parliamentary assistant who rose to national prominence in his widely-acclaimed defence of accused murderer Wilbur Coffin.

A determined opponent of capital punishment, Mr. Maloney is expected to support in the House of Commons an abolition bill which was recently introduced by his colleague, Frank MacGee.

Another participant in the debate will be Joseph Cohen, Q.C., one of Montreal's leading criminal lawyers, and a former member of the Legislative Assembly. Mr. Cohen, who also lectures in Criminal Law at McGill, has participated in such widely-publicized cases as the Fred Rose Trial and the Battaglia murder case. Rose, who was convicted of treasonous activity, a capital crime, spent seven years in penitentiary and then left for Czechoslovakia. Battaglia, the day after he was acquitted in court, was found in an outlying field, murdered.

Other participants include Prof. David McCord Wright, now of McGill and formerly the University of Virginia Law School who will introduce the resolution "that this house approves of capital punishment as a penalty for murder"; Claude Armand Sheppard, Gold Key debater and former WUS scholar; and Marvin Gameroff, Gold Key debater and husband of Pearl Sperber Gameroff, former star of the National Ballet Company.

The debate will take place at 8:30 pm tomorrow night, in Redpath Hall.

Scholarship Tax Planned At U of M

The University of Montreal General Students' Association is planning to inaugurate a five per cent surcharge from students participating in the association's activities to establish permanent scholarship funds.

Three scholarships are to be created to assist needy students as far as possible. There will be one classical, one scientific and one commercial scholarship.

According to the university newspaper, *Quartier-Latin*, "these funds can only have symbolical significance but we want to demonstrate that our aims are not only to help students now attending the U. of M. but also to create a system of aiding those who are now prevented from attendance through lack of adequate financial means."

The "education tax" is to be inaugurated on Education Day, March 5.

Prof. Brott Featured At Hillel Today

Professor Alexander Brott, eminent Canadian musician, will be the guest speaker at Hillel today in honour of Jewish Music Month. He has selected "Jewish Music and Music by Jewish Composers" as his topic for discussion.

Presently he is head of the String Department at the McGill Conservatorium and Professor of Music. Professor Brott is a graduate of McGill and of the Juillard School of Music. For twelve years he was the First Violinist and Concertmaster of the Montreal Symphony Orchestra where he is presently the Assistant Conductor.

He won first prize in the Pan-American Conducting Conference in Mexico in 1958. Prof. Brott also composes for the C.B.C. He was commissioned to compose music in honour of the Queen's coronation and also to illustrate Canada's ethnic groups, two resultant compositions that have received widespread acclaim.

Canada has twice chosen Professor Brott to be her representative at the Olympics as well as delegate, in 1946, to the Conference of Composers in Prague.

All students and Faculty are cordially invited to hear Professor Brott at the Hillel House, 3460 Stanley Street at 1 pm.

Bennett Speaks To UN Club

Defends U.S. Policy Toward Red China

by LESLIE HALPERT

A high-ranking U.S. Civil Servant yesterday defended the American policy of withholding diplomatic recognition from Red China.

Josiah W. Bennett, officer in charge of Chinese affairs in the U.S. State Department, emphasized the difference between diplomatic recognition and actual physical recognition, something "which is inevitable and which we must accept." Diplomatic recognition, he said, is a gift which countries have the right to withhold until the country under consideration has passed certain tests, most important of which is living up to international obligations.

Although Red China has signed various agreements since the Korean Armistice, they have all been ignored and broken.

National interests are paramount in considering the granting of diplomatic recognition. The United States stands to gain very little, and lose a great deal by granting it. Britain has lost

almost all of its investments in China even though it has extended recognition. Mr. Bennett explained that recognition by the United States carries a great deal of prestige. Many governments in Asia would immediately recognize China also and this would mean the establishment of diplomatic agencies all over the Far East.

Thus, Mr. Bennett said, "the balance is preponderantly in favour of non-recognition."

Mr. Bennett's appearance was sponsored by the United Nations Club.

McGill's Role In Chemistry Field To Be Discussed

"Highlights of McGill's Contributions to Chemistry" will be outlined today by Dr. C. A. Winkler of the Chemistry Department.

Dr. Winkler's speech will include a brief review of the development of the research school in the Chemistry department and an outline of the type of research being carried on presently.

He plans to mention the people involved in research and their particular jobs; the contributions of those who were and are important to the department will be discussed.

Included among famous members of the Chemistry Department is the late Frederick Soddy, who won the Nobel Prize for Chemistry.

The talk, sponsored by the Chemical Institute of Canada, will take place at 1 pm in room 104 of the Chemistry Building.

Grads To Honour Chancellor Powell

The Chancellor of McGill, R. E. Powell, and five other men and women will receive life memberships in the Graduates' Society at its annual meeting at 5:15 pm tomorrow in Redpath Hall.

In addition, presentation of awards for outstanding achievement will be made to two 1957 law graduates: James deB. Domville and J. Timothy Porteous, producer and author respectively of the musical satire, "My Fur Lady".

Life memberships, awarded in recognition of services to the Graduates' Society and to McGill, will be awarded to Mr. Powell, Mrs. E.C. Common and Mrs. W. D. Buchanan, of Montreal, Dr. E. Stanford Pulrang, New York, G. Heath MacDonald, and Dr. Cluny MacPherson, Newfoundland.

Stuart M. Finlayson, president of Canadian Marconi Company, will succeed Drummond Giles as president. Alan D. McCall, Montreal, will become first vice-president.

Other new officers to be installed will be: regional vice-

presidents: Cyril F. Horwood, St. John's, Newfoundland; H. C. Monk, Granby; Judge Hugh C. Farthing, Calgary; Harry M. Boyce, Vancouver; T.A.K. Langstaff, London, England; Dr. Basil C. MacLean, New York; Dr. David P. Boyd, Boston, and G. Leslie Laidlaw, Chicago.

New members of the board of directors: A. Maxwell Boulton, Dr. Gibson E. Craig, Robert P. Fleming, Allan C. Hill, all of Montreal, and B. M. Alexandor, Ottawa.

This Morning's Headlines News of National and World Significance

OTTAWA, Feb. 23 — The House of Commons today unanimously agreed to shelve its regular business in order to discuss the unemployment and dislocation of the aircraft industry in Canada due to the cancellation of the CF-105 Arrow program.

ST. JOHN'S, Nfld, Feb. 23 — Plans or legislation to prevent an extension of the 55-day loggers strike were announced at the opening of the Newfoundland legislature today.

OTTAWA, Feb. 23 — The two biggest industrial unions backing CBC producers voted to accept CBC terms little changed from those angrily rejected last week. Pending successful negotiations, the strike could end today.

SEC NOMINATIONS

The following have been nominated for the post of President of the Students' Society of McGill University:—

PAUL M. RAYNAULT B.Sc. 2
STUART L. SMITH MD. CM. 1
BRYCE K.A. WEIR MD. CM. 3

The election will take place on Tuesday March 3rd 1959.

Trouble In The Congo

The suddenness of the African uprisings in the Belgian Congo produced in Belgium a response which some European observers called "penitent". It included criticism of Belgian colonial policy in the Belgian Parliament and press. And it was accompanied by plans for setting up local governing bodies through elections and a program, undated, for Congolese independence.

Economic recession appears to have touched off the riots that exposed the weaknesses in the Congolese situation. Recent reports indicate that Belgian interests are stepping up investments and slum-clearing projects and are studying heretofore neglected analyses of the divisions of wealth as between the 13,000,000 African people there and the small European minority.

All this is to the good. But since the economic position of the Congolese natives was not kept at a level which precluded the political tides from other areas of independence-seeking Africa washing over into the Congo, it may be doubted whether mainly economic reforms will now turn the waves back.

It is interesting to note that the Congo's local elections are to take place in 1960. That is the year in which the Cameroons, Nigeria, and Somalia are scheduled for independence. This seems to reflect Belgian awareness that the Congo will never again be insulated from developments in other African regions.

It may be hoped this awareness will at least equal British and French perception of the need to cooperate with Africans in setting up national as well as local units of self-government and in trying to supplant old colonial ties with new bonds as between equal self-governing peoples.

The Krupp Puzzle

The Daily published an editorial a few weeks ago which apparently caused a great deal of comment on campus. It discussed the rebirth of the Krupp industrial empire in West Germany.

The Christian Science Monitor editorialized on the same subject last week. It was most interesting to read what the editors of this truly international newspaper had to say about a problem as complex as the rise of Kerr Krupp. For the benefit of our readers, we present those opinions in these columns.

"Very few persons outside the Krupp family and some employees can be happy at news that the Krupp industrial empire in West Germany is apparently being put back together and even enlarged. Yet several very practical questions are involved in whether the World War II Allies can or should hold Alfried Krupp to a postwar agreement to break up and dispose of his coal and steel enterprises by 1959.

"Two views of the matter are presented on this page. To those still seared by memory of Nazi cruelty, the role of Alfried Krupp's father as armorer to Hitler is not easily forgotten. But today the most serious threat of dictatorial rule comes not from a revival of Hitlerism but from a Soviet empire devoted to the spread of communism. Against that threat the West needs strength in West Germany.

"Herr Krupp points out factually that there is no one in West Germany with money enough to buy him out. The smaller Mannesmann syndicate has already been reorganized. The six parts of the former I. G. Farben chemical combine are likely to be reintegrated soon. The Krupp industries, of course, have made their postwar recovery without armament manufacture.

"There is a certain irony in the United States assenting to the reconcentration and expansion of Krupp holdings while its Department of Justice carries on an antitrust investigation of General Motors.

"But the West German Government now has its own laws against the revival of cartels, and Economics Minister Prof. Ludwig Erhard is a vigorous advocate of competition. There are also strong controls applicable under the relatively new European Coal and Steel Community.

"The misgiving raised by imminent revival of the Krupp industrial empire are that it will wield monopoly powers in trade and that it may form part of a remilitarized Germany. As to both these hazards, the best hope lies in democratically strong German government and a peace-serving sense of European unity.

"Unless these can really be depended upon, this newspaper believes there is ground for the deepest reservations against permitting a revival of farflung power in the Krupp industrial empire."

We agree.

Daily Letters

Open Daily To All Students

To the Editor:

In the editorial of Feb. 19 the *Daily* seems to have realized at last that 'any student at the University should have the right to submit an article for publication.' As most students and a large part of the population of Montreal know, the *Daily* last year did not print my article on the question of the strike and statutory grants to the University. I was forced to take to the city press, and at great trouble and expense to myself, to put out my own paper and speak on radio in order to state my views.

The ordinary newspapers are entirely different animals from the *McGill Daily*; people are not required to buy or subscribe to them, they are financially independent entities and can support any views or opinions that they want to, exclude what they want from their pages, set forth the views of their publishers or hold a neutral position. On the other hand, the students are the publishers of the *McGill Daily*, a part of their fees are handed to the *Daily* while advertisements are attracted to it by the name of the University and its students.

Clearly then, the *Daily* cannot be run like the ordinary newspaper and, for instance, support the views of one group to the exclusion of the opinions of others. The editors can use the editorial column to state their personal opinions but should leave the other pages for the views of members of the student body whether or not the editors and the SEC agree with these views. And most important in the case of the *Daily*, we should prevent it from becoming the sounding board of the SEC as it was last year. In this connection I suggested that an elected board of students should be set up to

see that the *Daily* prints both sides of each discussion and does not arbitrarily exclude the views of any student, and also to make sure that fallacious charges which

can damage the reputation of the whole body of students are not made again. I again recommend this course of action.

APPLICATIONS

are hereby called for the following positions:

CHAIRMAN OF THE BOARD OF MANAGERS

CHAIRMEN OF THE FOLLOWING UNION COMMITTEES

Poster, House Operations, Program, Social Events, Publicity and Promotions, Decorations and Electrical Pool, Public Relations, Public Address.

All students applying for the above positions must have previous experience on a Union committee and must be in good standing with the University.

Application forms may be obtained at the Union Tuck Shop but must be turned into the Tuck Shop by 4:00 P.M., Wednesday, March 4, 1959.

Morality Thwarts Art at U of Sask

The cause of Experimental Art has met fresh resistance from the ranks of Morality.

Causing the latest storm is a torrid student dramatic production in rehearsal at the University of Saskatchewan, which a group seeking "new moral standards" on the campus has labelled "obscene... appalling... not nice" for its liquor and sex excesses.

The show: Gilbert & Sullivan's *The Gondoliers*.

The criticism came from Debating Director, Doug Korman who charged last week that *The Gondoliers*, an operetta to be presented later this month, has "obscene aspects."

He said the plot of the Gilbert and Sullivan operetta contains allusions to sex which would be offensive to not only the students on the campus but also the citizenry of Saskatoon.

Mr. Korman said he has witnessed rehearsal sessions and said he "would not like to describe some of the things that go on in the operetta."

"The operetta", he said, "is not nice."

ERRATUM

Candidates running for President of any of the Undergraduate Societies may use 200 words for their combined pen sketches and platforms, and not 100 words as previously announced.

Candidates wishing to have their platforms published in the Daily should hand in their entries to George in the Tuck Shop no later than Friday at 2 pm.

TUESDAY, FEBRUARY 24

AMATEUR RADIO CLUB: Elections at 1300 hours in the Shack.

CCF CLUB: Plans for a model parliament, reorganization and general business will be on the agenda at 1 pm in the Clubroom.

CHEMICAL INSTITUTE OF CANADA: Dr. C.A. Winkler will speak on "Highlights of McGill's Contributions to Chemistry" from 1-2 pm in Room 104 of the Chemistry Building.

CHORAL SOCIETY: Practice from 5-6:30 pm in the Union Ballroom.

HILLEL: Professor Alexander Brott will speak on "Jewish Music and Music by Jewish Composers" at 1 pm in the Hillel House. At 4 pm the Talmud Study Group will be held.

SPANISH CLUB: General business meeting at 1 pm in the Union Ballroom.

UNITED CHURCH STUDENT'S FELLOWSHIP: "U-Askit" night at 8 pm at 3508 University St.

WEDNESDAY, FEBRUARY 25

CANTERBURY CLUB: Service of Holy Communion at 8 am in the Chapel at 3473 University St.

HILLEL: Noon-hour debate, "Resolved that a good Jew should be a Zionist", at 1 pm at the Hillel House.

PHILATELIC SOCIETY: Election of officers and swapping session at 7:30 pm in the Union Lounge.

SCIENCE FICTION SOCIETY: Library meeting at 1 pm in the Union Workshop.

SOCIALIST SOCIETY: Fifth lecture in the series "Problems of Socialism" at 6 pm in the Union Clubroom.

Daily Letters

HEENAN WORRIED

Mr. Heenan is worried that "the favourable climate of opinion which has grown in support of the students and the universities" might be destroyed. Any favourable public opinion existed was destroyed when the public was informed that an article which opposed the views of the strike-leaders was suppressed and that no vote was allowed on the strike.

I seriously advise Mr. Heenan and future Students' Society Presidents that on matters affecting the whole student body, an opportunity should be given to all students to express their views in the Daily and votes should be taken in order to find out what is the majority opinion.

I have now submitted another article to the Daily; I trust that it will be published and that the paper might become a medium for the circulation and interchange of ideas and opinions without which there can be no development of sound courses of action.

John Patrick Barrados,

M.A. 1.

Redmen Meet 'Y' In Crucial Game

by PHIL SINGER

The McGill Redmen Basketball squad will put their three game losing streak on the line tonight when they meet the YMHA Davis Blues at eight pm at the Sir Arthur Currie Gymnasium. The contest is the second game of a two-out-of-three semi-final series. The winner of this series will meet the victor of the series between the Quebec Steelers and Loyola Warriors. The Blues have already beaten the Redmen 94-68 in a game played last Monday at the Davis 'Y'. In the other series the Steelers won the opener by a measly ten points. It was expected that this powerful squad would make a shambles out of the Warriors, but the game proved differently, even though the Steelers won.

In their encounter last week against the 'Y', the Redmen started off on a disastrous streak. Since that game, they have been beaten soundly by both the Assumption University Lancers and the University of Western Ontario Mustangs. The first place Lancers trounced the Red and White 106-48, while the second place Mustangs won by a score of 87-44.

The road that lies ahead is uphill all the way for the Redmen. The Blues have proved that they are a better team than the McGillians by beating the Redmen twice this year. Larry Lyons has been the difference between the two teams. In the first match of the season, he scored 33 points while in last week's contest he netted 43 points, a new Montreal Basketball League record. If (and it's a big IF) the Redmen can hold Lyons to a degree, they will have an excellent chance of beating the Blues. Also, they will definitely have to play quite a lot better than they did in the series opener.

LOOKING AHEAD

All is not hopeless for the big red basketball team if one is to look into the future. They started off the year with almost a complete squad of rookies. This includes Coach Ron Sharpe, who deserves a considerable amount of praise for his efforts this year. The team opened the season by losing

their first few games. However they improved steadily and began to win. They upset the Toronto quintet and beat the low-flying McMaster Marauders in Intercollegiate League play. In the MBL they beat the University of Montreal twice and the Loyola Warriors once.

The rookies that joined the team are no longer rookies. They have proven themselves. Players like Gary Ulrich, Bruce Stein, Lance Thompson, and Cal Cooper, to mention only a few. Another bright spot is the fact that only one first stringer graduates this year. He is Captain John Finch, who is probably the most valuable of all the players on the team. He will no doubt be missed next season but it is hoped that one of the others will be able to replace him adequately. Looking at the situation the other Intercollegiate League teams are in, it looks much brighter for the Redmen next year.

Braves Set For Last One

by HAROLD SHAPIRO

Wednesday afternoon at 5 pm, the McGill Intermediate Hockey Team terminate their season when they meet the Sir George Williams Senior team at the McGill Winter Stadium.

Last Wednesday, these same two teams met; the game ending in a 7-4 win for the Braves and a general free-for-all. Fred Von Zuben had received quite a ribbing from the Georgians throughout the encounter, and this egged McGill on to a point where a high-sticking incident turned into a large scale fight. Referee Leo Konyk joined the act; answering a Georgian post-game remark with a well-placed fist in the antagonist's face.

Leading the way for the locals were Colin Moseley and Pat Morrow with two goals each. Claude Vaillancourt played his usual good game in the Brave nets.

Several men, ineligible this year, are Redmen material, and

will probably be wearing the Senior Red and White next season, barring unforeseen difficulties. Fred Von Zuben has been the number one centre on the team, and shows excellent stick-handling and play-making ability. Pete Seely, a first year Arts student, has showed himself to be a good all around player at the left wing position. Pat Morrow, a husky defenceman from Sudbury, may play for the parent team, if he can afford the time. Johnny McLernon, another freshman Artsman, is a good digger and backchecker, these being two qualities that the Redmen can definitely use.

The McGill Intermediate team have been trying to get into the Ottawa — St. Lawrence Conference. The Georgians, presently in the top half of this League, have lost 2 of 3 games to the Braves. Since their first loss to the Georgians by a score of 5-2, the locals have improved and

took the second and third contests by convincing scores of 6-3 and 7-4.

The Constitution of the Conference states that a college cannot enter a 'second' team in the league. However when a team shows itself to be of at least the calibre of one of the better teams in the league, they certainly deserve to be a part of that league. A meeting in the near future will decide the fate of the Braves.

The Braves, like the parent Redmen, have improved since the beginning of the season. Although coach Dave Copp's boys have lost some close encounters of late, they have usually managed to outplay their rivals, but, like most McGill teams, have not had Lady Luck on their side.

The game on Wednesday will be followed by the Redmen-Laval game; so that 4 hours of good hockey are on tap tomorrow.

Q. What is Canadian Chemical?

A. A young, progressive and fast-growing Canadian company. Its \$75,000,000 plant on a 430 acre site at Edmonton, Alberta, consists of 3 plants — a petrochemical unit, a cellulose acetate manufacturing unit, and a filament yarn plant. It has its own power plant and water treating facilities to supply steam, electricity, water and compressed air. The Company also has technical facilities necessary to provide for the development of new processes and products and control of the quality of its products.

Q. What do we make at Edmonton?

A. Canadian Chemical's three integrated plants at Edmonton use the products of Canada's forests and vast oil fields... producing for world markets high-quality supplies of ORGANIC CHEMICALS, CELLULOSE ACETATE FLAKE, ACETATE YARN AND STAPLE FIBRE.

Q. What are my job opportunities?

A. Our engineering department is one of the largest and most diversified in Canada. We have technical and professional services... extensive laboratory facilities for operational quality control of our many products... for developing and piloting new products and processes. We operate our own power plant and water treating facilities.

Q. What would I be doing?

A. Chemical engineers are needed for a complete range of unit operations at our plant. As one of our chemical engineers you would be filling one or more of these important duties:—

- process design work
- studying process additions and changes
- production supervision and administration
- field inspection
- planning to improve efficiency, or increase production
- supervision of detailing or estimating
- new product development
- meeting and solving challenging problems as a member of our corrosion and inspection group — seeking more suitable materials, modifying designs to increase equipment life in corrosive processes
- studying latest developments in protective coatings — testing and utilizing promising new products

Challenging job opportunities also exist for mechanical engineers, chemistry graduates, electrical engineers and engineering physics graduates — as discussed in other ads of this series.
